

WEEE and RoHS Compliance

PRAN Systems is committed to providing its worldwide customers products that meet highest environmental standards.

Manufactured products comply with Directive 2002/96/EC (recast as Directive 2012/19/EU), a legislation enacted by the European Union regulating the disposal of electrical and electronic equipment (Waste Electrical and Electronic Equipment, or WEEE).

As for Directive 2002/95/EC RoHS (recast as Directive 2011/65/EU), which restricts the use of certain hazardous substances in EEE (Electrical and Electronic Equipment)—including:

- ✓ Lead (0,1 %)
- ✓ Mercury (0,1 %)
- ✓ Cadmium (0,01 %)
- ✓ Hexavalent chromium (0,1 %)
- ✓ Polybrominated biphenyls (PBB) (0,1 %)
- ✓ Polybrominated diphenyls ether (PBDE) (0,1 %)

PRAN Systems' instruments are classified as Category 9 items (Monitoring and Control Instruments) and installed as first or second mount in vehicles. These instruments are exempt from the restriction according to the article 2 paragraph 4(c, f) of the Directive RoHS 2011/65/EU and are also exempt, according to the article 2 paragraph 3(b) and 4(d) of the Directive WEEE 2012/19/EU. However, being an eco-friendly company, PRAN Systems Inc. has decided to comply with both directives.

Here are the actions undertaken by PRAN Systems as per Directive 2012/19/EU:

- ✓ We conform to the recyclability (55%) and valorization rates (75%) specified in the latest version of the WEEE directive.
- ✓ We label our products with the mandatory crossed-off garbage container pictogram.
- ✓ We implemented a procedure available upon request, detailing the required steps to safely and quickly dismantle our products as well as of disposing of substances, preparations and components that contain hazardous materials.

Treatment facilities or end customers that wish to receive detailed information on the re-use, recycling and disposal of PRAN Systems products, should write to the following address:
