

# CONFIGURATION TOOL FOR TURN KEY SOLUTIONS

Body builders can now get rid of their old relay systems and migrate to a modern multiplexed system with no programming skills required. **CAN-Guru™ Express** allows you to configure a vast list of plug-and-play kits in a user-friendly environment. Through a drop-down menu, choose between preprogrammed options to quickly and easily customize each vehicle to your clients' particular needs.

## No programming skills needed

- Use existing templates to customize your vehicle
- Work in a user-friendly environment
- Trainings available
- Free customer support

## Flexible

- HVAC configurations
- Configure flash patterns
- Seatbelt alerts
- Low voltage management with alerts
- Special configurations available on demand

## Benefits

- Manage several configurations easily
- Fast to implement
- Quick and easy to learn
- Scalable : improve your system over time
- Best approach to migrate towards latest technology
